PROJECTS

ERP LAMI 5.2

Utilize the Digital Manufacturing Platform for provisioning hardware, managing devices, and seamlessly collecting data from machines on the production floor. Connect different hardware protocols to enterprise or cloud software using the Edge Gateway. Make use of enterprise-grade security mechanisms and artificial intelligence based on machine learning. Design and deploy digital manufacturing frameworks for data source to final decision analytics.

Clients:

- . Sonalika Tractors
- . CRI Pumps

PROFESSIONAL EXPERIENCE

LogicApps Technologies India Private Limited, Sr Software Engineer

July 2022 -Present | Chennai

- I worked on a software product called LAMI 5.2 ERP as an application developer, responsible for structuring and developing the application.
- Developed numerous pages and concepts within the application.
- Interacted with clients and implemented changes as per their requirements.
- Set up a local client server to efficiently manage and maintain the application code.
- Created tables and stored procedures in Microsoft SQL Server.
- Debugged and fixed any errors or bugs in the application.
- Implemented dashboards in the application using Telerik.
- Deployed the application on Azure Cloud and virtual machines, ensuring efficient deployment and scalability.
